

I respectfully urge the FCC to reject NAB petition 04-160 limiting the local programming that satellite radio stations provide. The conventional radio stations have been increasingly purchased by single entities (like clear channel) bringing local radio closer to a monopoly state. America should be about competition to ensure the highest quality of innovation for the community and the highest quality of service to the customer. Please reject NAB petition 04-160 and protect our coveted freedom of speech and our American way of life.
